**EXCITING NEWS
FOR 2025**

SICKLE MOWERS

I & J Precision Cutting Sickle Mowers are durable enough to operate for many years under the toughest conditions. Mowing is smooth and efficient.

Unique German ESM "Busatis bidux" double sickle cutters result in virtually no plugging. Heat treated blades hold their edge longer and produce a cleaner cut. The Pitmanless gear allows the bar to cut in any position.

I & J Precision Cutting Sickle Mowers produce precision cut, high quality hay and promotes regrowth better than any other system.

NEW IN 2025

An exciting new product for 2025 is the Twin Bar Sickle Mower. This machine features all of the time-testing, reliable components of the rest of the I&J mower line-up, but offers a much wider cutting swath of 17 ft. An additional feature of this machine is the hydraulic cylinder on the wheels, which enable the operator to steer the mower from the tractor seat.

Hydraulic steering cylinder enables easy maneuvering.

SCAN ME

You can see the new mower in action at:
i-jmanufacturing.com/sickle-mowers

The final field testing will be done on the new Twin Bar Sickle Mower as soon as first cutting alfalfa is ready to cut. We expect to be able to begin filling orders by the end of May.

A man's favorite donkey falls into a deep precipice. He can't pull it out no matter how hard he tries. He therefore decides to bury it alive.

Soil is poured onto the donkey from above. The donkey feels the load, shakes it off, and steps on it. More soil is poured. It shakes it off and steps up. The more the load was poured, the higher it rose.

By noon, the donkey was grazing in green pastures. After much shaking off (of problems) And stepping up (learning from them), one will graze in GREEN PASTURES.
